

ACRYSPORT ARENA GLAS
-WE CAN TAKE THE HIT!

Hockey Arenas Embrace Value of **ACRYSPORT**

A true Apples and Oranges approach is being used when comparing ACRYSPORT ARENA GLAS and other available shielding. Many NHL, AHL and CHL team arenas are taking advantage of our product. Utilizing a proprietary process and a formula developed for use in military applications, ACP NOXTAT has introduced a superior product that clearly outdistances the competitive products available on the current market.

ACRYSPORT ARENA GLAS offers the arena the tough, abrasion-like resistance of glass while maintaining the flexibility of acrylic. ACP's COO and 20 year employee Tracee Huwe states: "This product was specifically designed to withstand much of the pounding and everyday rigors of high impact sports."

ACRYSPORT ARENA GLAS –

ACRYSPORT ARENA GLAS is a TEC-2000 sister product that gives you the strength of TEC-2000 with the slick properties of the ACP NOXTAT OPTEC lens Coating. Our ACRYSPORT ARENA GLAS is scratch and abrasion resistant with the broadest range of chemical and solvent resistance available. ACRYSPORT ARENA GLAS is a transparent coating typically applied from 4 to 6 microns thick.

Applications

ACRYSPORT ARENA GLAS can be used in almost any sports application where high impact and maximum durability is a requirement

ACRYSPORT ARENA GLAS
