

ACRYSPORT ARENA GLAS™
-WE CAN TAKE THE HIT!

CLEANING INSTRUCTIONS FOR ***ACRYSPORT ARENA GLAS***

The **ACRYSPORT ARENA GLAS** surface is very hard and durable with superior transparency. It is important to keep the surface luster at its best to be invisible to the spectator. The surface should be washed and kept clean with standard non-abrasive glass cleaning solutions, such as Windex or non-commercial spray cleaners, or other liquid cleaning methods. Do not use excessive harshness, gentle washing should be sufficient. Finishing the process by polishing lightly with cotton flannel or soft paper towels and **ACRYSHINE™** will do the job nicely.

Hexane or kerosene can be used to remove grease, oil or most other petroleum based products. These solvents may be obtained at a paint or hardware store and strict adherence should be used with manufacturer's recommendations.

Spot cleaning of the inside surface will require more extreme measures. The marks from the puck and helmets are usually residue on the surface that can be removed with the help of special rubbing compounds, polishing on the specific surface and then apply a high sheen wax. Scratches through the surface of the coating can only be cleaned with the window cleaner to make it less visible.

Acceptable cleaners:

Fantastik® • Glass Plus® • Formula 409® • Top Job® • Mr. Clean® • Windex® Window Cleaner

SPECIAL NOTE: Do not use abrasive cleaners on **ACRYSPORT ARENA GLAS**. Some of these cleaners may attack the uncoated side or edge of the sheet.

The **ACRYSPORT ARENA GLAS** sheets are branded on one end for identification. All claims for damage or warrantee for sheets that do not have the original **ACRYSPORT** brand on them will be denied.

ACRYSPORT ARENA GLAS™ —

ACRYSPORT ARENA GLAS is a TEC-2000 sister product that gives you the strength of TEC-2000 with the slick properties of the ACP NOXTAT OPTEC lens Coating. Our ACRYSPORT ARENA GLAS is scratch and abrasion resistant with the broadest range of chemical and solvent resistance available. ACRYSPORT ARENA GLAS is a transparent coating typically applied from 4 to 6 microns thick.

Applications

ACRYSPORT ARENA GLAS can be used in almost any sports application where high impact and maximum durability is a requirement
